<b>What is the difference between HathiTrust and Google Books?</b>	<p>Many works that are available in HathiTrust are not present in Google Books because they were not digitized by Google, or not available in Google Books because of differing rights determination processes. The largest categories of these include U.S. federal government documents and public domain works published in the United States after 1923.</p> <p>HathiTrust has a traditional online public catalog interface, with powerful querying and advanced search options. Full-text searches inside in-copyright materials yield information about the location of search terms that occur throughout the work, helping users determine the relevance of works to their topic or find information quickly in a print copy close at hand.</p>
